

Ruby Fortune Casino

The award-winning Ruby Fortune has proved a favourite amongst players since its arrival in May 2003. There are 220 games to choose from including over 140 Slots, and a large selection of table games and several progressive games including Major Millions which has jackpots that regularly exceed \$2,000,000. The site uses Viper software, the latest edition of the Microgaming casino software, which is the most advanced of its kind. The Viper platform introduces a range of groundbreaking games as well as some new innovative features. These include 'Auto Play' that allows you to select the number of hands or spins to play and then plays them for you flawlessly and 'Expert Mode' that allows the software to automatically play the best strategy and prompt you if you've made a mathematically unsound decision. Other useful features include 'PlayCheck' that shows a complete transaction history of every wager that has been made by the player. The Viper software is available in downloadable form or as an instant play flash casino and players have the chance to play for free with a 'Guest' account before registering a 'Real' one.
